## Complete Stone and Ceramic Care

### **No. 21S Pores Filler-** Hardening Agent for absorbent stone such as Sandstone and Limestone *Prevention is cheaper than restoration • Use Finalit Pretreatment on all sides (incl edges) before laying*

- Applied to one side, 1 litre covers about 50m<sup>2</sup>(500ft<sup>2</sup>)
- Applied to all sides, 1 litre covers about 20m<sup>2</sup>(200ft<sup>2</sup>) for normally absorbent materials
- Applied to all sides, 1 litre covers about 10m<sup>2</sup>(100ft<sup>2</sup>) for highly absorbent materials

#### Application

- Apply Finalit No.21S on clean surface either by spray, roller, or paintbrush
- Drying time up to 1 hour
- Can be applied to damp surfaces

#### Characteristics

- Hardening agent
- Bonding agent, better adhesion to bonding agents: mortar, grouting material
- Protection against stains
- pH-neutral, resistant to UV rays, antifungicide, anti-slip
- Dilutable with water to maximum 1:3 for less absorbent materials
- To be applied pure to concrete, sandstone, limestone, terracotta
- To be applied twice to highly absorbent materials
- Joining aid, no discolouration at the joints
- Facilitates grouting, easy removal of grouting residues
- No bowing
- Greatly reduces the risk of algae formation
- No efflorescence after laying when applied to all sides
- Repeat impregnation as required, recommended once a year

#### Packaging

- 1L, 5L, 25L plastic containers. 100L, 200L, 500L, 1000L containers As at March 2007

#### LEED-NC 2.2 EQ Credit 4.2: Low-Emitting Materials: Paints and Coatings

Product VOC Content (g/L): 0.474

Allowable VOC Content (g/L): 100

Source of VOC Data: Manufacturer's Safety Data Sheets

#### Technical Data

Vapour pressure at 20°C      23 hPa  
 Density at 20°C                1.027 g/cm<sup>3</sup> □ □ □ □
