

StoneCare Canada Corporation

Complete Stone and Ceramic Care

No. 40 Citrus Scent Cleaner (For All Surfaces)

Biodegradable and Environmentally Friendly

What happens when you don't clean right?

Soap-based cleaners

- Soap locks in dirt. Your floors look Streaked and Hazy.
- Floors can become Slippery and Dangerous
- These effects get worse each time you clean

Cleaners that contain Acid

- Attack the impregnation and destroy joints
- Marble Floors loose their shine

Important tip for daily cleaning

With impregnated floors, water cannot penetrate into the floor or joints. So it's especially important that you use a squeegee to remove excess water, dry the surface with a cloth, or use a wet vac to remove excess liquid. This is also very important for non-impregnated floors.

Manual Application

Measure Finalit No.40 out into it's screw-top cap

Dilute with water 1 capful per 5L pail

Dip brush into pail and apply

Squeegee off wet floor. Once a month clean with a machine then vacuum off residue. Done, your floor is clean and disinfected.

Machine Application

Add 0.1L to 1.0L per 100L of water. Clean with white brush or white pad.

Leave on up to ten minutes

Vacuum off residue

Floor is left clean and disinfected

Properties

- The Number One cleaner for all household and building materials (all-purpose cleaner)
- Contains no soap or alcohol (no dirt-buildup, no streaking)
- Highly disinfectant (excellent for floors, WCs, bathrooms, swimming pools)
- pH neutral (floors stay shiny , no damage in cracks and joints)
- Fresh citrus fragrance
- Impregnations and anti-slip treatments remain sound for a long time
